Alcolite Median Marker

Made of Tough, Impact Resistant Injection Moulded Thermoplastic Body.

Made of Tough, Impact Resistant Injection Moulded Thermoplastic Body.

ABS Body Confirm to ASTM D256 Standards.

Made of tough, impact-resistant thermoplastic body, reflectORIZED on either side using fluorescent yellow prismatic sheeting, **Alcolite Median Marker** is a highly durable reflective product for medians. Designed to take the rigors of natural weathering, the product makes the medians extremely visible thereby preventing accidents and saving invaluable lives on roads.

Features :

- Unique Design.
- Inaccessible edges & embedded reflective material prevent vandalism.
- Reflective surface inclined at around 20 degree (to vertical) to harness maximum reflectivity.
- Checkered ribs at the bottom improve anchorage to the substrate when applied with Alcolite Epoxy.

Fluorescent Reflective Sheeting

The fluorescent yellow retroreflective sheeting used in **ALCOLITE** Median Marker gives.

- Excellent visibility during dawn, dusk and all times during day & night.
- Excellent long distance visibility for extended distances, enhancing safety standards on roads.
- Excellent angularity offering highest visibility.
- Offers 40% greater visibility during the day and 50% during the night.
- Offers excellent luminance, throughout the approach regardless of the marker or vehicle placement.
